DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows: in claim 19, line 4, "the first internal antenna" is changed to --a first internal antenna--

Allowable Subject Matter

- Claims 1-29 are allowed.
- 3. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-10 and 22-23 is the inclusion of the limitation of the modular antenna housing and second antenna are configured to engage the wireless terminal device to cause the wireless terminal device to operate with the second antenna while the first internal antenna remains in position in the wireless terminal device with the second antenna disengaging the internal antenna from operation. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 11-15 and 24-25 is the inclusion of the limitation of an internal antenna remains substantially in position in the wireless terminal device, the wireless terminal device being configured to operate with the

internal antenna when the modular housing is not mounted thereto, and wherein, when mounted, the modular housing is configured to disengage the internal antenna. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 16-18 and 26-27 is the inclusion of the limitation of a signal feed configured to electrically connect to the first internal antenna when the second rear panel with the second antenna is not mounted to the housing and electronically connect to the second antenna when the second rear panel with the second antenna is mounted to the housing via a connector positioned in the cavity of the housing, responsive to whether the second rear panel with the second antenna is in position on the housing, wherein, in position the second rear panel with the second antenna is configured to disengage the first internal antenna from operation. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught or suggested by the prior art of record which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 19-21 and 28-29 is the inclusion of the limitation of step disengaging the internal antenna from operation responsive to the mounting of the modular antenna assembly so that the wireless terminal operates with the second antenna instead of the first internal antenna. It is this limitation found in each of the claims, as it is claimed in the combination, that has not been found, taught

prior art.

Any comments considered necessary by applicant must be submitted no later

than the payment of the issue fee and, to avoid processing delays, should preferably

or suggested by the prior art of record which makes these claims allowable over the

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."

Correspondence

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Shih-Chao Chen whose telephone number is (571) 272-

1819. The examiner can normally be reached on Monday-Friday from 7 AM to 4:30

PM, First Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Don Wong can be reached on (571) 272-1834. The fax phone number for

the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
